

SPC Marble Sheet Machine

One Million USD Profit Per Year Brings A Fast Growing Business Project

Composited SPC artificial marble sheet has multiple layer: UV coating layer, color layer, stone plastic layer and basic layer; compared with real stone sheet, whatever wear-resistance, stain-resistance, or dimension distortion resistance, PVC artificial marble materials has the significant advantages.

SPC Marble Sheet is the best ideal alternative material for nature stones with the awareness of people's environmental protection, SPC is recyclable materials and with the high glossy and similar density weight, normally it is hardly distinguishable from the real ones

According to incomplete statistics, there are more than 1,000 new extrusion machine were setting up, the highly demand and good profit is the marketing driving.

StarsPlas is a NTD Group Company since 1994, there are more than 500 successful Mixing and Extrusion projects running in worldwide.

Item	SPC Marble Sheet Machine
SPC Sheet Production Output	700sheets / day
Sizes of SPC Sheet	1220x2440mm
Cost Price of Production	2.98~3.47\$/square meter 9~10\$/sheet
Marketing Price	5.2~6.6\$/square meter 16~18\$/sheet
The profit of each SPC Marble Sheet	7-8\$/sheet
The profit of each day by 700 pieces sheet	5,000~5,600\$/day
The profit of one production line one year	1.8~2 Million \$/year

How much investment for machine?

Item	Price
SPC Marble Sheet Machine	135,000\$
UV Coating Machine	48,000\$
Amount	183,000\$

How much cost in materials and labors?

Item	Cost
Materials(PVC,CaCO3,Additives)	460~550\$/Ton
Marble Film(Depends on different quality)	0.2~0.5\$/square meter
Labors	3Person/Shift 3Shifts Recommend
